Re: Township of Plumsted's Grant Application to the NJDOT Safe Routes to School Program

Dear Mayor Bowen,

I was informed that Plumsted Township is applying for an NJDOT Safe Routes to School grant to request funds for a safety project focused on student and pedestrian safety. As a Plumsted resident, with a child/children who attend(s) the Plumsted Township School District, I wanted to express my support for this project through this letter.

There is a recognized need to improve the methods our children utilize to travel to and from our local schools. Plumsted streets, including residential blocks, have large gaps in our network of sidewalks and other safe modes of walking or biking. I appreciate the Township's determination to address this and improve the safety of our children.

If there are any other ways that I can help with either the application or the project, please let me know.

Thank you,
